

PennDOT Open Data Portal Crash Data Dictionary and Field Constraints Tables

pennsylvania
DEPARTMENT OF TRANSPORTATION

The Public Crash Data files consist of data obtained from Police Crash Report data submitted to PennDOT by investigating police agencies, driver reported data from the AA600 Driver's Accident Report form, and calculated fields kept in the Crash Data Analysis and Retrieval Tool (CDART) database. Data that is protected due to containing Personally Identifiable Information, or that could be used to infer information about persons involved in a crash are not included in the public dataset.

The annual data extract is kept as a series of Microsoft Excel CSV files and are organized as 8 distinct data tables as follows:

CRASH – Data that is relevant to the crash from crash reports, and calculated summary fields are contained in this table. The Crash Record Number (CRN) is used to identify unique crash cases. This number is created by the crash reporting system as each new crash case is created. Not all crashes are included in the final consolidated list of reportable crashes. Incomplete, duplicated, and non-reportable crashes are excluded from the annual data extract.

FLAG – This table contains fields that identify a crash by category. For each category, the field will contain a 0 if the crash cases does not meet the criteria for the flag and a 1 if it does meet the criteria. Each field can be used for data selection or for counts of crashes that meet certain criteria. The CRN is used as the key for this table and has a one to one relationship to the CRASH table.

VEHICLE – This table defines a unique Motor Vehicle or Non-Motorist Unit involved in the crash. It contains information regarding the motor vehicle or non-motorist and some flags that identify the unit as meeting certain criteria. The CRN and Unit Number (UNIT_NUM) fields identify a unique unit within the crash and has a one to many relationship with the CRASH table. All reportable crashes must have at least 1 UNIT and must have a motor vehicle in transit (which includes hit and run motor vehicles).

CYCLE – This table contains VEHICLE information for Motorcycles. The CRN and UNIT_NUM define the unit that corresponds to the vehicle record. There is a one to one relationship between the VEHICLE table and the CYCLE table. If the VEHICLE record does not have a Vehicle Type (VEH_TYPE) of "2", then no CYCLE table record should exist for that VEHICLE record.

COMMERCIAL - This table contains VEHICLE information for commercial vehicles. The CRN and UNIT_NUM define the unit that corresponds to the vehicle record. There is a one to one relationship between the VEHICLE table and the COMMERCIAL table. If the VEHICLE record does not have a Commercial Vehicle (COMM_VEH) of "Y", then no COMMERCIAL table record should exist for that VEHICLE record.

TRAILER - This table contains VEHICLE information for Trailing Units. The CRN, UNIT_NUM and define the unit that corresponds to the vehicle record. There is a one to one relationship between the VEHICLE table and the COMMERCIAL table. If the VEHICLE record does not have a Commercial Vehicle (COMM_VEH) of "Y", then no COMMERCIAL table record should exist for that VEHICLE record. There can be as many as 3 Trailer records for one VEHICLE.

DEFINITIONS (Selected Crash Data Terms)

Aggressive Driving – If any driver was listing as having any of the following actions -- Making illegal U-turn, Making improper or careless turn, Turning from wrong lane, Proceeding w/o clearance after stop, Running stop sign, Running red light, Failure to respond to TCD, Tailgating, Sudden slowing or stopping, Careless passing or lane change, Passing in no passing zone, Making improper entrance to highway, Making improper exit from highway, Speeding, Driving too fast for conditions, Driver fleeing police (police chase). NHTSA Aggressive Driving involves a driver with at least 2 of these actions.

Autocycle – A 3-wheeled motorcycle with an automotive seat and steering wheel.

Driver Fled Scene – Indicates the Unit remained at the scene, but the vehicle driver left the scene.

Electric Vehicle (EV) – A motor vehicle with an electric powered motor. This does not include hybrid electric/fossil fuel powered vehicles. This does not include low speed vehicles, or golf carts.

Hit and Run – Indicates the unit struck or was struck but did not stay at the scene.

Large Truck – Trucks designed for heavy use such as a wrecker, box truck, cement mixer, car hauler, or larger commercial trucks.

Low Speed Vehicle – A vehicle designed for short distance travel on residential roads very similar to a golf cart but meeting the definition for a street legal Neighborhood Electric Vehicle.

Midblock – A crash that took place on a roadway but not at an intersection.

Motor Vehicle – A motor driven transportation device with a powered engine or motor. This does not include electric powered vehicles under 750 watts or a maximum speed less than 28 miles per hour.

Non-Motorist – Operator or Occupant of a non-motorized unit such as a bicycle, personal conveyance, horse and buggy, etc.; or a pedestrian.

Pedalcycle – A pedal powered vehicle such as a unicycle, bicycle, tricycle, etc. “Other Pedalcycle” refers to any pedalcycle that is not a bicycle.

Pedestrian – A person not in a motor vehicle that is walking, standing, sitting, lying, or being carried, pushed or pulled by another pedestrian. This does not include persons operating or riding on personal conveyances.

NOTE: The definition of pedestrian changed in October of 2025 due to inconsistencies and direct contradictions in definitions stemming from implementing the non-motorist unit type on January 1, 2024.

Pedestrian Conveyance – This term will no longer be used by the Pennsylvania Department of Transportation due to direct contradictions in definitions. (SEE PERSONAL CONVEYANCE)

Personal Conveyance – A non-motorist riding a mobility or recreational device such as a Wheelchair, Mobility Scooter, Foot Scooter, Skateboard, Balanced Scooter, eScooter, Roller Skates, etc. This can be non-powered or electric powered conveyances. This does not include bicycles/other pedalcycles, animal drawn or gas-powered vehicles. This also does not include ridden animals.

Phantom Unit – A Motor Vehicle that contributes to the events in a crash (a driver action or vehicle failure) but does not have any harmful events (non-contact).

Reportable Crash – A crash must take place on a roadway open to the public, involve at least one motor vehicle in transit (including those stopped in traffic), and involve a fatality, injury, or enough damage to a motor vehicle that it cannot be safely driven (usually involving a tow from a scene), in order for PennDOT to include the crash to our database of reportable crashes.

Roundabout – A Roundabout is a yield-controlled circular intersection built to specifications for a modern roundabout.

ROV – A recreational off-road vehicle. These are 4-wheeled, gas-powered vehicles with open-air passenger compartments with seating for 2-4 people, designed for off road travel.

Small Truck – Trucks designed for personal or light use such as pick-ups.

Traffic Circle – A traffic circle is a primarily yield-controlled circular intersection not built to specifications for a modern roundabout.

Vulnerable Roadway User – A Pedestrian, Personal Conveyance, Bicyclist (other than electric bikes), or Other Pedalcyclist. This does not include ridden animals or animal drawn conveyances.
